

GEANT – MT®
Management & Trading

COMPANY PROFILE

ANTAKI Company was established in Syria in 1925 as a private and family company and where Mr. George E. ANTAKI, who is on the head of our Damascus main office, represents actually the fourth generation.

At the beginning of 2010, we restructured the Company for a new commercial entity and a new address registered officially in Syria where Mr. Elian G. ANTAKI is the FONDÉ DE POUVOIR in this new structure and Mr. George E. ANTAKI is the GENERAL MANAGER.

Our new address is as follows:

GEANT – MT®
Management & Trading
P.O.Box: 3033
DAMASCUS - Syria
Tel. : +963 11 44 38 70 00
Fax : +963 11 44 38 70 03
E-mails : info@geant-mt.com
Website : www.geant-mt.com

Initially, our main activity was to import and distribute in the local private market the major foodstuffs such as dairy products, cereals, sugar, tea, coffee and raw materials.

In 1980, the prohibition of importation faced by the private sector in Syria obliged us to direct our activity and to deal with the public sector by participating in their international tenders for the range of products of our main activity especially the rice, the sugar and the wheat and, at the same time, we diversified above activity while participating indirectly in many of the turnkey projects tenders as exclusive agent of the companies or consortiums that we organized especially for these tenders.

In 1985 and due to difficulties and lack of foreign currencies in Syria, we succeed by personal efforts, to realize in the first time of the history of Syria the following two private Protocols of barter deal between the Ministry of Planning in Syria and two European companies:

Jadet Al Khatib No. 4 – Building No. 13 – 1st Floor

Management & Trading

1. A Protocol for US\$ 60 million between UNCEA (Union Commercial pour l'Europe ET l'Afrique - France) and Syria where UNCEA with its affiliated company in Switzerland named at this period ANASSO and actually GETI TRADE S.A. supplied dairy products against Syrian Rock Phosphate. The relative banking agreement was made between Credit Lyonnais in France and Central Bank of Syria. We succeeded to execute this protocol completely.
2. A Protocol for an amount of DM 100 million between DANISH TURN KEY DAIRIES (Denmark) and Syria to supply dairies, cows and irrigation systems. Part of this protocol has been executed against different Syrian products such as Crude Oil, Phosphate, Cotton and cotton yarn, cement, etc...

In addition, we managed and executed many barter transactions, among them some ones to recover debts due by Syria to worldwide pharmaceutical manufactures and others for specific purpose such as the case of a contract with Aleppo railways for the supply of wagons to GECOPHAM (General Company for Phosphate and Mines) which we executed against Syrian Rock Phosphate, and other contracts to settle debts due by Syria to a Bulgarian Company which we executed against Syrian Lentils, as well as many other barter contracts.

Our role in above deals wasn't only to find the purchaser for the proposed Syrian commodity for bartering, but our experience and activity were to prepare from the beginning the contract of supply to be in compliance with the execution of the contract of export of Syrian commodities from the technical and financing side. Our role was also to draft the banking arrangement and to follow up execution of contract to export the Syrian commodities with the purchaser we suggested, and this in order to avoid and eliminate any risk which the foreign company contracting for barter could face especially that usually this company is not familiar with these Syrian commodities.

On the other hand, due to our good and close relations with our concerned authorities we has been also involved in the Syrian crude oil business where we granted to ARCADIA PETROLEUM LIMITED - UK a long term contract to lift Syrian light crude oil that has been revolving for many years. We represented Arcadia during all these years and kept always very good contacts with it.

Due to our experience and to our excellent relations with our local public sector and due to the assistance of the strong companies that we represented, we succeed perfectly in this field.

In addition to what above mentioned, we are very active in environment, inspection and consultancy fields and we represent valued and well known

specialized international companies who got and executed with success several contracts in Syria due to our assistance.

Our very long existence in the market together with our very large experience and our excellent relations at high levels with both public and private sectors allows us to be very flexible and to move very easily in any project and any commodity needed by our local market.
